

Armenian Spectrometer

Overview

The Alikhanian-Alikhanov spectrometer was a large solenoid physical instrument constructed by brothers Abraham Alikhanov and Artem Alikhanian at the Aragats scientific station in Armenia. The spectrometer was unique in the world. It had the highest amount of magnetic field (1,0x0,3x0,15 cubic. The presence of Stevia extracted from Armenian leafs proved by modern instrumental method. A leader in clinical trials, bioequivalence studies, drug pharmacokinetics, and laboratory diagnostics. MitrAlab. Laboid International in Armenia, has been a trailblazer in the domain of laboratory equipment since its inception in the year 2018. We have also acquired. Armenia Spectrometer market currently, in 2023, has witnessed an HHI of 1586, Which has decreased slightly as compared to the HHI of 2909 in 2017.
