

Austrian optical receiver QSFP28

Overview

The QSFP28 module provides 100GBase-LR4 throughput up to 10km over a standard pair of single mode fiber (SMF) with duplex LC connectors. This transceiver is compliant with SFF-8661, SFF-8636, IEEE 802.3 100GBASE-LR4 and QSFP28 MSA standards. Digital diagnostics functions allow access to real-time. This real-world case highlights a key truth: fully understanding QSFP28 transceiver specifications is not just theoretical — it directly impacts deployment timelines, budgets, and network performance. Whether you are upgrading an existing 10G infrastructure or building a new 100G network, choosing the QSFP28-100GBase-LR4 is a 103/112 Gbps transceiver module designed for optical communication applications compliant to 100GBASE-LR4 of the IEEE P802. The module converts 4 input channels of 25Gb/s electrical data to 4 channels of LAN WDM optical signals and then multiplexes them into a single.
