

Disposable cold joint

Overview

The Cold Pack Disposable reduces pain, relieves swelling and expedites recovery for sprains, slight bumps and dislocation of bone joints. The ClimatePartner certified product label confirms that a product meets the requirements for the five steps in climate action including calculating carbon footprints, setting reduction targets, implementing reductions, financing climate projects and communicating transparently to continuously. An acute sprain, a post-surgical site, or a stubborn knot in the trapezius all demand one thing: targeted, deep-penetrating cold therapy that conforms to the body's contours without leaking. The difference between a good cold pack and a frustrating one lies in gel viscosity, surface area coverage. Experience instant pain relief - The extra insulation keeps it cold and effective, to quickly reduce swelling and pain. Easy to use - These cold therapy ice packs for injuries do NOT need a freezer to become ice cold. All you have to do is squeeze the center of the flexible ice pack and it will. Simply fold and activate our cold compress instant ice pack, providing immediate relief. Perfect for on-the-go use at home, in the gym, or outdoors.
