

Earth Connection Box

Overview

Earth Connection Boxes allow the earthing connection of the iron-frame and the neutral link, in an insulated way from the rest of the installation. They are located inside the transformer substation. · Sealing option available. Each box includes four pozi-drive screws for installation and a warning sticker that reads 'SAFETY ELECTRICAL CONNECTION - DO NOT REMOVE', to deter tampering. When should you use. Unicrimp's QEP2G is a green polyamide 6/6 earthing box (100×100×50 mm) supplied with a safety label to protect and identify earth rod connections. Niglon is a family run business with over 50 years experience in the electrical trade. This product is developed to BS 7430/6651. Usage: To house connections to earth rod using PVC conduit from building and nylon gland to rod.
