

# Enabling SNMPv3 on Huijie Fiber Optic Switch

## Overview

To enable SNMMPv3 operation on the switch, use the snmpv3 enable command. An initial user entry will be generated with MD5 authentication and DES privacy. Before configuring SNMPv3, familiarize yourself with the applicable environment, complete the pre-configuration tasks, and obtain the required data. Cisco recommends that you have knowledge of these topics: SNMP protocol (Simple Network Management Protocol). Familiarity with SNMP Object Identifier. We have a pair of MDS 9132T FC Switches and we are trying to find where to enable SNMP so that we can add monitoring of ports and system health to our PRTG Monitoring System. 09-20-2022 10:08 AM An Unexpected Error has occurred.
