For more parameters, please. Fused Biconic Taper (FBT) coupler, also be called FBT splitter, based on the traditional technology, it is to bundle together two or more optical fibers, and then pull the cone machine melt stretching, and real-time monitoring the change of the ratio, spectral ratio requirements after melt. hen a small split configuration is needed. All optical fibers used in Wirewerks FBT splitte s are bend insensitive ITU-T G. A very precise and high tech produc-tion will allow the splitting of the signal to be equal ratios (the frequency bands of 1310 ± 40 nm, 1490 ± 10 nm, and 15.
