

Fiber optic cable for communication segments in Libya

Overview

This 8,700-kilometre fibre-optic network, encompassing 24 fibre pairs and a capacity of 20 terabits per second per pair, is set to connect 11 countries across the Mediterranean, including Libya, by the end of 2025. Libya has formally integrated into the Medusa subsea cable system, marking a pivotal advancement in its telecommunications infrastructure. This 8,700-kilometre fibre-optic network, encompassing 24 fibre pairs and a capacity of 20 terabits per second per pair, is set to connect 11 countries across. Connecting all cities in Libya to the fiber optic cable network (NGBN), which is the basis for building the Next Generation System (NGN) projects, which will be implemented through projects that include a fiber optic network within cities and villages in order to provide various communications. Market Forecast By Platform (Civil, Military, Space), By Application (Avionics, Navigation, Weapon Systems, Communication Systems), By Type (Single-mode, Multi-mode) And Competitive Landscape How does 6Wresearch market report help businesses in making strategic decisions?

6Wresearch actively. The Medusa Submarine Cable System this week announced a deal with the state-owned Libyan United International for Telecommunication and Technology (LUIC) to land the cable in Tripoli and Benghazi. "Medusa was born with the goal of being the most important cable in the Mediterranean and, to achieve. The Libyan optical fiber cables market soared to \$X in 2025, with an increase of X% against the previous year. This figure reflects the total revenues of producers and importers (excluding logistics costs, retail marketing costs, and retailers' margins, which will be included in the final consumer. The company offers a wide range of services, including fiber optic network design, installation, and maintenance, as well...
