

Fiber-to-the-Home Router

Overview

To find the best router for fiber internet, we used our expertise to select items based on key specs, such as speeds, coverage, wireless standards, security, weight, and additional features. We conduct in-house testing to check their signal strength, speed, and file. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Archer BE550 serves up tri-band Wi-Fi 7 across 2. Stream more, game harder, and multitask without a hitch. EasyMesh support turns weak spots into history while fortified security keeps networks.
