

Grenada receives fiber optic cable

Overview

Key Insight: Grenada has made significant progress in expanding its fiber optic network, reaching 85% coverage in 2026. The import of fiber optic cables to Grenada surged in 2024, with the USA, Panama, China, Dominica, and Jamaica leading the way. This infrastructure development has greatly enhanced internet speeds and reliability, supporting both residential and business users. In addition to offer Trinidad and Tobago with a diverse best-in-class solution with an alternate landing site, the system will. Part of the World Bank funded Caribbean Regional Communications Infrastructure Programme (CARCIP) national broadband project involves the installation, maintenance, and operation of an undersea cable system connecting Grenada, St Lucia, and St Vincent and the Grenadines. The following are some of the major sector highlights since that time.
