

How is the fiber optic cable laying industry doing

Overview

According to industry reports, the pace of laying optical fibers in India significantly surged, rising six-fold since the onset of 5G services. The global fiber optic cable market was valued at USD 13 billion in 2024 and is estimated to grow at a CAGR of 10. Increased broadband. The Fiber Optic Cable Market Report is Segmented by Cable Type (Armored Cable, Non-Armored Cable, and More), Fiber Mode (Single-Mode Fiber, Multi-Mode Fiber, and More), Installation Type (Aerial/Overhead, Underground/Buried, and More), End-User Industry (Telecommunication, Power Utilities and Smart. The fiber optic cable market is surging to \$32. 5 billion by 2030, driven by data centers, 5G, and IoT. 70% during the forecast period of 2026-2035. The demand for fiber optic cables is slated to rise with the growth of the telecommunications sector, surging government intervention. The fibre optic cables that carry the data by the use of light signals have a much greater advantage over traditional copper cables because they have a higher bandwidth, faster connectivity, reliability, and less signal gets lost due to long distance. High internet usage today, growth in broadband.
