

# How much does a computer room network cabling system cost

## Overview

Professional network cabling in 2026 typically costs \$150-\$250 per commercial Cat6 drop, \$200-\$350+ per harder Cat6A commercial drop, and \$200-\$400 for isolated finished-wall additions where minimum service-call labor dominates. Open-wall pre-wire lowers the per-drop cost. Network installation costs vary significantly, ranging from \$2,500 to \$6,000 or more, as there's no one-size-fits-all network cable installation pricing model. This article provides practical price estimates and a clear cost breakdown to help buyers plan a budget and compare quotes. To estimate costs for your project: 1. Set Project Zip Code Enter. The Structured Cabling Cost Calculator is a valuable online tool designed to estimate the total expenses associated with cabling projects. By considering factors such as cable length, type, additional components, and labor, the calculator provides an accurate breakdown of costs. It enables. The cost to install a computer network can vary widely depending on the size of the business, number of devices, building layout, and the type of equipment being installed, but small business network installations commonly range from about \$1,000 to \$10,000 or more.
