

How much does galvanized magnesium-aluminum cable tray cost

Overview

The average cable tray price per meter ranges from \$2 to \$25, depending on material, type, size, and surface finish. For bulk orders or project pricing, the cost can be significantly lower. The main cost driver is the material used in manufacturing:

- Galvanized steel is the most common.
- Panduit E1 Series - Premium aluminum systems at \$8-12 per foot with superior corrosion resistance
- T&B Copperfield - Mid-range steel options at \$4-7 per foot with standard configurations
- Carlson NEMA - Budget-friendly PVC solutions at \$2-5 per foot for light-duty applications
- Atkore
- HellermannTyton - .

The price of a cable tray is easily changed by the type of material you use. But it is not merely the cost of the metal, but also where the tray will live and how long it must last. Steel trays typically cost between \$5 to \$25 per meter. They are strong, durable, and widely available, making them ideal for general-purpose electrical installations in residential, commercial. However, if you need a steel tray that's galvanized for corrosion resistance, it'll cost you more. Galvanizing is a process where a protective zinc coating is applied to the steel, and this extra step adds to the production cost. Pre-galvanized to BS EN 10346:2015 (standard references throughout brochure). The patented UniKlip® system enables 3X faster installation speeds.
