

How to install the cable management bracket at the back of the computer case

Overview

Lower the notches on each end of the cable tray over the brackets, and slide the tray (either toward the front or back of the desk) until they click into place. Run the power cord through the cable tray. Common cable management techniques are cable shortening, lengthening, color changing, and sleeving. These pictures severally piss me off because they are \$250+ cases that have rat nests in them. WHY PEOPLE WHY!!!!!! Such good cases ruined by ignorance and stupidity The 2 main things that determine. Note: If you are installing more than one system now, install the cable-management arm after you install the other systems into the rack. Ensure that you have the following parts.
