

How to remove the adhesive from the fiber optic cable slot

Overview

Cutting and stripping the cable jacket can be done with a special fiber stripper or a properly set wire stripper as long as it does not damage the fiber. Diamond lapping films (polishing papers) are used to remove zirconia ferrule material, this is needed when a glass fiber breaks off below the ferrule surface. Adhesives: Adhesives need to be purchased separately. They are sold separately to allow better material. At times though, you may find that you need to recover bonded parts or clean parts to remove excess cured epoxy. Factories terminating fibers use heat-cured epoxies because they produce the best. I have this connector on my optic fibers cable and I want to remove the connector so I can pass through a hole in the wall I have no tools for optic fiber cables and i cannot make the whole any larger, can I remove the connector from the cable and put it back on ?
