

Latest news in the co-packaged optics sector

Overview

These pressures are driving renewed momentum behind co-packaged optics (CPO). According to LightCounting, sales of lasers and photonic integrated circuits for optical transceivers are expected to grow from \$2.9B by 2029, fueled largely by AI data centers. For years, data-center performance scaled by following a familiar playbook: faster GPUs, higher SerDes rates, and increasingly aggressive board designs. That playbook is no longer holding for today's AI systems. As AI clusters push beyond 100 Tb/s per node, the gap between what silicon can generate. The strategic investment in optical component suppliers Lumentum and Coherent heralds a new era of optical interconnects inside AI data centers. This podcast explores the auto industry's transition to 48V power architectures, zonal E/E architecture, and software-defined vehicles. Advanced. Co-packaged optics (CPO) technology, a key enabler for next-generation data center architectures, promises unprecedented bandwidth density and power efficiency by tightly integrating optical engines with switch silicon. But after nearly a decade of existence, where does this next-generation optical. Dublin, April 03, 2025 (GLOBE NEWSWIRE) -- The "Co-Packaged Optics Market by Product Type (Optical Engines, Optical Modules, Optical Transceivers), Form Factor (Embedded Modules, Onboard Optics, Pluggable Modules), Application, End-User - Global Forecast 2025-2030" report has been added to. The silicon photonics industry is entering a period of rapid growth and diversification, according to Yole Group's new report, Silicon Photonics 2025 - Focus on SOI, SiN, LNOI & InP Platforms.

Co-Packaged Optics — a deep dive | APNIC Blog

One primary motivation for co-packaged optics is improving power efficiency. Both Broadcom and NVIDIA report dramatic power-per-bit savings

Five Key Trends of Co-Packaged Optics (CPO) in 2026

These pressures are driving renewed momentum behind co-packaged optics (CPO). According to LightCounting, sales of lasers and photonic integrated

Coherent shows 6.4T CPO, 400G lanes at OFC 2026

Coherent (NYSE: COHR) will demonstrate multiple co-packaged optics (CPO) technologies at OFC 2026 in Los Angeles on March 17, 2026.

Co-Packaged Optics: Inevitable but Not Imminent

The report reviews CPO technology and applications, the relative benefits and issues, its impact on pluggable optics, and Cignal AI's expectations

Global Co-Packaged Optics Market Size, Share,

Global Co-Packaged Optics Market is expected to grow from \$ 15 mn in 2022 to \$ 2840 mn by 2032, at a CAGR of 68.9% during the forecast period 2032.

Global Co-Packaged Optics (CPO) Technology Market Research

The global market for Co-Packaged Optics (CPO) Technology was valued at US\$ 44.6 million in the year 2024 and is projected to reach a revised size of US\$ 960 million by 2031, growing

Where co-packaged optics (CPO) technology stands in

Co-packaged optics (CPO) technology, a key enabler for next-generation data center architectures, promises unprecedented bandwidth density
