

Lebanon LPO optical module OSFP

Overview

The 800GBASE-DR8 OSFP LPO (Linear-drive Pluggable Optics) optical transceiver module is designed for 800GBASE Ethernet throughput up to 500m link lengths over OS2 single-mode fibre (SMF) using a wavelength of 1310nm via dual MTP/MPO-12 APC connectors. An LPO (Linear Pluggable Optics) solution offers considerable power savings for optical interconnect by removing the digital signal processing (DSP) function from the pluggable optical module. This architecture takes advantage of the capabilities in each segment of the link to form a power, cost. As hyperscale data centers shift toward AI-optimized fabrics and ultra-high-bandwidth switching platforms, the OSFP (Octal Small Form-Factor Pluggable) form factor has become central to next-generation optical architectures. The idea is simple: instead of a DSP (digital signal processor) inside the module - replacing it with transimpedance amplifier (TIA) and a driver chip with high linearity and EQ capability - LPO shifts signal processing into. Amphenol's 200G/lane optical modules support DR4, FR4, 2xDR4, 2xFR4, AOC, and breakout AOC configurations with LC or MPO ports, ideal for 800G/1. Fully compliant with OSFP MSA, IEEE 802. 3, and OIF-CMIS standards, and RoHS compliant per EU directives 2011/65 and 2015/863. com Europe FS EuropeFREE SHIPPING on Orders Over EUR 79 VAT excl.
