Meraki aggregation switches are built from the ground up to be easy to manage without compromising the power and flexibility traditionally found in enterprise-class switches. To bring up a Meraki switch, simply plug it in. Meraki switches do not require CLI for switch configuration or port management. Meraki's centralized management gives administrators a number of benefits that make it easier to build campus networks: Compact, 1RU design for space-constrained environments Terabit performance with non-blocking architecture Field-replaceable, hot-swappable power supplies/fans Front-to-back cooling Dedicated management port Low power consumption and shallow rack depth, which enable flexible deployment Stacking option for building redundant architectures Designed for. Cisco Meraki MS switches include a limited lifetime hardware warranty that provides next-day advance hardware switch replacement as long as the original purchaser owns the product. Meraki's simplified software and support licensing model also combines all software upgrades, centralized systems management and phone support under a single, easy-to-un. * Single power supply (PSU) included. For redundancy, second PSU is sold separately.
