

## Nokiage optical module

### Overview

This module operates at a wavelength of 1310 nm via an LC connector. It functions at temperatures between 0°C and 70°C. The transceiver also includes Digital Optical Monitoring (DOM) support for real-time access to operating parameters and is TAA compliant. The Nokia optical breakout solution delivers flexible, scalable options with the elegant fiber management required for IP and data center network deployments. As fiber network infrastructure undergoes significant expansion to meet the evolving needs in modern, dynamic IP and data center networks. NOKIA 3HE09327AA compatible SFP+ transceiver supports up to 10km link lengths over LC duplex SMF fibre. This transceiver is compliant with SFF-8431, SFF-8432 and IEEE 802. It has a minimum guaranteed optical budget of 22 dB, which typically is enough to reach about 60 km. However, distance is only an indicative parameter calculated for identification. The Alcatel-Lucent Nokia 471880A. 101 SFP transceiver delivers 1000BASE-LX throughput up to 10 km over single-mode fiber (SMF). • Transmission Distance: Up to 1.
