

Odn optical cable

Overview

An Optical Distribution Network (ODN) is the passive fiber infrastructure that connects the Optical Line Terminal (OLT) in the central office to the Optical Network Unit (ONU/ONT) at the subscriber side. Unlike active equipment, the ODN does not require electrical power. Operators consider ODN design as one of the most important factors affecting: Network coverage Optical loss performance Deployment cost (CAPEX) Long-term. ODN, or Optical Distribution Network, is an FTTH network based on PON equipment that provides an optical transmission channel between the OLT and the ONU. It directly. bre cables for signalling systems and telecom networks. Ever since its foundation in 1971, Cablescom has co ups due to the reliability and quality of its products. Acting as the physical “bridge” of a Passive Optical Network (PON), it determines signal quality, reach, cost efficiency, and. Grandway provides a full range of ODN optical distribution network products (ODF, FOSC, ODC, FDB, FTB, ONU) and customized services. It has the advantages of large.
