

Philippine E2000 Low Temperature Resistant Connector

Overview

The E2000 fiber optic connector provided by HYC meets the working environment of $-40\sim 85\text{ }^{\circ}\text{C}$, with an average of more than 500~1000 insertion and removal tests, with stable performance and reliable quality. The E-2000® connector, invented by DIAMOND, delivers unmatched reliability and precision in fiber-optic interconnects - making it the ideal choice for critical transmission points across telecom, industrial, medical, and more applications. By checking this box I confirm that I have read the Privacy. The E-2000™ connector is the most mechanically robust FO connector. Combined with R&M's quality requirements for raw materials, design, and workmanship, it guarantees the most stable transmission performance over the entire 25-year system warranty. It precisely butts the two ends of fiber, reduces the loss of optical link as much as possible, and enables the optical signal output by transmitting optical fiber to be coupled to the receiving optical. The unparalleled mechanical and optical interface of the E-2000® connector family makes it an ideal choice for many applications.
