

# Price quote for a 25-meter telecommunications tower

## Overview

Telecom tower pricing typically ranges from \$15,000 to over \$150,000 for the structure itself, heavily dependent on height, design type, and current global steel prices. A 25m telecom tower provides 1. 5-3 km coverage radius in urban areas and 3-5 km in suburban zones, supporting 6-12 cellular antennas on just 1-2 m<sup>2</sup> footprint when configured as a monopole. Built to ANSI/TIA-222-G standards with hot-dip galvanized steel, these towers withstand 200 km/h wind loads. How much does it cost to build a cell tower, including site acquisition, zoning & permitting, structural analysis, direct materials like steel and concrete, and labor for site construction?

On average, the total cost to build a cell tower in the United States is \$250,000, while in Western Europe it. A 25m telecommunication monopole is a type of telecommunication tower structure that consists of a single vertical pole or mast with a height of 25 meters. : The monopole cell tower includes a tower body and a working platform connected to the upper part of the tower. For professional procurement engineers, site supervisors, and telecom infrastructure planners — this document delivers a full-spectrum technical breakdown of a 25m monopole telecommunication tower. From wind loading calculations (TIA/EIA-222-G) to metallurgical selection, from fabrication. Shop for 25m Self Supporting Angular Telecom Tower at our factory. We offer high-quality, durable and reliable telecom towers for all your communication needs.
