

Remote control of high-voltage distribution box

Overview

Remote power switches, also known as Power Distribution Units (PDUs) or "power strips" - enable you to have remote control over the power to your equipment. This is handy both for on/off control and, in the case of jammed or stuck gear, to remotely power cycle devices. It has the functions of monitoring the low-voltage side load and frequency of the distribution transformer, collecting power, and controlling the. Product positioning Intelligent distribution box monitoring instrument, supporting real-time electrical data collection, energy consumption measurement and safety early warning. It can be equipped with a high mix of circuit breakers and fuse units and offers plenty of space for feeding cables. With the optional Intelligent Load Management, this.
