

Stainless Steel Cable Tray Connecting Plate

Overview

Constructed from SS 316 stainless steel for superior corrosion resistance, it features a powder-coated finish for added durability and aesthetic appeal. With a 50mm load depth and compliance with NEMA standards, this splice plate offers dependable performance in demanding. Cable trays are components used in the wiring of buildings to support insulated cables and organise them to be hidden from view. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. In fact, the stainless steel (or rather the chrome) forms a thin, invisible layer of chromium oxide whenever it comes into contact with oxygen: the oxide film. If the oxide film suffers damage, then the. Multipurpose metal accessory used for the joining of straight sections, making bends or other accessories with the Rejiband wire mesh tray. It is fixed to the tray or accessories by screws, ensuring the mechanical strength of the joint and the electrical continuity, according to IEC61537 standard. Designed to meet NEMA standards for reliable cable management.
