

Sudden power outage at home distribution box

Overview

In this video, I'll guide you step-by-step on how to identify and fix the issue using your home's DB (Distribution Board) box, without needing to call an electrician. This tutorial is specially made for beginners, homeowners, tenants, or anyone who doesn't have a technical background. The ICP (Power Control Switch) has tripped (it used to be in the breaker panel, but now it is built inside the meter). There's a fault somewhere inside your own installation. With a handful of practical, no-nonsense steps, you can zero in on the root of the problem, potentially get the lights back on, and. While storms and grid overloads can cause area-wide outages, many sudden power losses start with wiring issues, overloads, or faulty appliances. If your electricity suddenly went off, there's no need to panic! Let's explore some common causes, troubleshooting steps, and what to do. This guide provides a structured approach to identifying the cause and implementing proper safety protocols until service is restored. Look outside to observe the nearest streetlights and your.
