

Thailand Core Switch 400G

Overview

A compact 1U 400G switch built for AI clusters, storage fabrics, and high-speed aggregation, featuring four 400G QSFP56-DD ports, dual 10 Gigabit Ethernet, and RouterOS v7. With hot-swap power supplies, robust cooling, and low power consumption, it delivers ultra-high bandwidth, wire-speed. Edgeworks Optics delivers high-performance, reliable optical transceivers designed for data centers, AI clusters, and telecom networks. Our solutions ensure scalability, energy efficiency, and seamless interoperability for next-gen connectivity. The transmission distances specified on this page are. Our Cisco Nexus 9000 Series Switches portfolio offers distributed modular, centralized modular, and fixed switches including super spine, spine, leaf, and border leaf. A new modular chassis design. The AS9700-32X switch is a thoughtfully optimized design tailored for Leaf/Spine deployments, catering to 400/100G network requirements. In response to the explosive growth of data, the 400G switch aims to meet the network demands of hyperscale data centers and cloud computing service provider.
