

What is the purpose of an EOC terminal box

Overview

The core function of the EOC console is to monitor all incoming emergency signals, such as wireless distress signals and ultra-high frequency (UHF) messages. The console display unit also displays information regarding a helicopter's flight and its current position via GPS. An emergency operations center (EOC) is a central command and control "coordination structure" responsible for managing emergency response, emergency preparedness, emergency management, and disaster management functions at a strategic level during an emergency. It is the central hub for any data, video, or network communication in and out of an EOC. The majority of consoles will. An EOC is a physical or virtual location from which leaders of a jurisdiction or organization coordinate information and resources to support incident management activities (on-scene operations).
