

What router should I use with a 1 gigabit fiber optic connection

Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). With the many options available on the market, picking the best router for fiber internet can be tricky. For budget-conscious. Whether your router can handle a 1Gbps (Gigabit per second) connection depends on several factors, including the router's specifications, hardware capabilities, and firmware/software support. Therefore, to help you choose the best routers for fiber internet, the guide below consists of the top options for fiber internet. If you're looking for a router that can handle gigabit fiber, it's important to consider a few key factors before making your purchase.
