

Which fiber optic cables are in high demand

Overview

Rising backbone upgrades for 5G, sustained hyperscale data-center builds, and government-funded rural broadband programs continue to reinforce demand for high-capacity glass fiber links, while steady declines in preform costs improve project economics. The global fiber optic cable market was valued at USD 13 billion in 2024 and is estimated to grow at a CAGR of 10.20 billion by 2033, at a CAGR of 2% during the forecast period. Enterprise migration to cloud platforms. The global fiber optic cable market is experiencing robust growth, driven by the increasing demand for high-speed internet connectivity, the proliferation of 5G networks, and the expanding cloud computing infrastructure. The market size, estimated at \$50 billion in 2025, is projected to expand. Fiber optic cable is a cable containing one or more optical fibers that are used to carry light signals over long distances with minimal loss.
