

Zimbabwe s border demarcation

Overview

Zimbabwe is a landlocked country in southern Africa, lying between latitudes 15° and 23°S, and longitudes 25° and 34°E. In total, the country covers an area of approximately 390,760 km² (150,873 mi). The border of Zimbabwe is a complex network of land and riverine boundaries shared with four neighboring countries: South Africa, Botswana, Zambia, and Mozambique. These borders, often delineated by natural features, are crucial for trade, migration, and regional stability. When did the border making begin?

The fascination with marking out territory. Abstract Far from being open borders, including under globalisation, the borders of Zimbabwe have become increasingly defined over time. For example Zimbabwe boundary line data can be used to draw border line on Google map or polyline on equirectangular map image.
